PROFESSIONAL PROFILE

Lead AI engineer building governed production systems across LLM applications, evaluation, enterprise integration, and adoption. Delivered RAG and agentic workflows in healthcare and energy, including a 72-seat deployment that reached 92% active use in 30 days.

SELECTED IMPACT | 92% 30-DAY ADOPTION | 8,021 PROMPTS | \$52.7K EST. ANNUALIZED NET VALUE

CORE EXPERTISE

AI Systems: RAG, agentic workflows, tool calling, LLM evaluation, retrieval metrics, judge calibration, grounding

Engineering: Python, SQL, Java, REST APIs, pytest, GitHub Actions, Azure Functions

Enterprise & Governance: Azure AI Foundry, Microsoft Graph, Blob Storage, Salesforce, HIPAA-scoped delivery, least privilege

PROFESSIONAL EXPERIENCE

Lead AI Engineer | Behavior Frontiers

Jul 2026 - Present

National behavioral-health organization; HIPAA-scoped workflows

- **AI Adoption:** Led rollout and measurement of Microsoft Copilot across 72 HQ users; built a daily Microsoft Graph pipeline that recorded 66 active users (92%) and 8,021 prompts in the first 30 days.
- **ROI Governance:** Built a conservative model estimating \$52,654 in annualized net value after license costs using usage-tiered benefits, a 50% realization factor, and zero attributed executive benefit.
- **Payer Intelligence:** Built an in-house pipeline from Transparency-in-Coverage files; validated 10 payer sources and returned comparable rates for 4, supporting \$24K in annual contract avoidance.
- **Security Architecture:** Designed a least-privilege Salesforce integration identity to block model access to out-of-scope intake fields and documented six privacy, security, and data-quality launch gates for Azure AI Foundry.

AI Engineer / Technical Project Manager | Capital Energy

Sep 2025 - Jul 2026

Residential solar provider

- **RAG Delivery:** Designed and shipped a retrieval-augmented generation assistant with agentic routing for inbound solar workflows, reducing response time 40%.
- **Automation & Platform Migration:** Built a lead-reactivation voice agent with Voiceflow, Twilio, and ElevenLabs; led the Core 365 CRM migration and Make/Zapier automations that reduced manual work 40%.

AI Prompt Engineer & Model Trainer | Outlier | Handshake | Mercor

Nov 2024 - Present

Contract engagements supporting frontier-model post-training

- **Model Evaluation:** Evaluated frontier-model responses against client-defined rubrics and produced preference data for post-training workflows spanning factuality, instruction-following, and safety.

Instructional Designer & AP Computer Science Teacher | Gilbert & Higley Unified School Districts

2017 - 2025

- **Technical Education:** Taught AP Computer Science in Java and Python, led STEM instruction, and designed inter-rater reliability methods later reused in the public LLM-judge calibration project.

SELECTED AI ENGINEERING PROJECTS

LLM Evaluation & Retrieval Gates | [kappa-gate](#) + [rag-gate](#) | Python, pytest, GitHub Actions; 30-case judge calibration gated at $\text{kappa} \geq 0.70$ and $\text{agreement} \geq 85\%$, plus recall@3 , MRR, and citation-grounding checks.

Provider Targeting & Agent Grounding | [target-gate](#) | Azure Functions, Blob Storage, Microsoft Graph, Azure AI Foundry; twice-monthly delivery gated on NPI checksum, duplicates, freshness ≤ 16 days, field coverage $\geq 80\%$, and every-market coverage; agent brief refused when 1 of 5 cited NPIs was invented.

CERTIFICATIONS & TRAINING

NVIDIA Deep Learning Institute: Building RAG Agents with LLMs

2026

IBM: RAG and Agentic AI Professional Certificate

2026

Databricks: Get Started with Generative AI

2026

Anthropic: Claude Code in Action

2026

EDUCATION

M.S., Artificial Intelligence Engineering | Quantic School of Business and Technology

Expected 2027

M.Ed., Administrative Leadership | Arizona State University

2022

B.A., Journalism & Mass Communication | Arizona State University

2013
